

Awards Presented to St. John Ambulance Classes Last Friday

Service of Men Highly Spoken of
by Chairman and Tribute
Paid Dr. Borden

St. John Ambulance local branch members have been awarded their prizes following recent examinations in first aid work. Dr. R. F. Stewart was the examiner.

Certificates—L. Caroe, C. J. McQuarrie, W. P. Lonsbury, E. Price, W. Graham, H. Turner, E. Salvador, A. Wilson, O. Bambino, A. Oliva, T. DeCocco, S. Penny and G. Vincent.

Vouchers—E. Jones, J. Janorak, G. Rayman, O. Celli, Al. Fawille and E. Bond.

Medallions—H. Hulbert, R. Davidson, M. Cornett, J. Kilgannon, J. Rushton jr., G. Derbyshire and A. J. Phillips.

Label—H. Parkinson, J. Goulding, A. E. Corney, E. X. Hill, E. Hill, J. Cousins and N. Fleming.

The presentation was made at a public function presided over by O. E. S. Whiteside, general manager of International Coal & Coke Co. Ltd., G. Kellogg, vice president of McGillivray Creek Coal & Coke Co. Ltd., presenting the awards. Both spoke in eulogistic terms of the valuable services given by the first aid men, and of their splendid work in mine accidents.

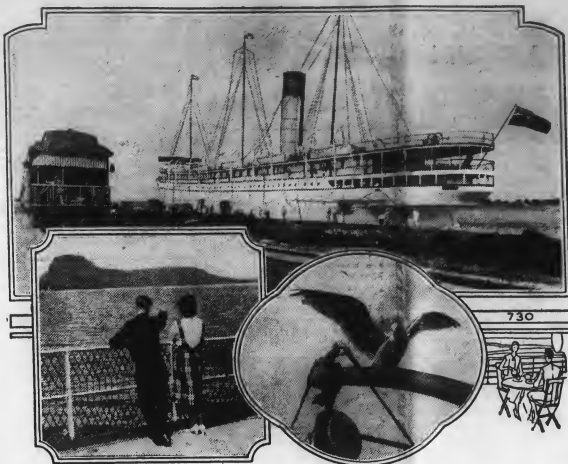

Dr. Borden, mine surgeon, was presented with an ophthalmoscope, an instrument used in inspecting the interior of the eye, by the St. John Ambulance classes, in appreciation of his faithful services as instructor.

To John Rushton, sr., credit is due for his many years service as secretary of the local branch, which was recognized by Col. C. A. Hodgetts, director-general, on his recent visit to the Crow's Nest Pass to inspect first aid teams at Coleman and Michel.

In his address Mr. Whiteside recalled that the first classes in Coleman were held in 1910, and that twice teams here had been awarded the championship for the entire Dominion. The Canadian Institute of Mining & Metallurgy sponsored the teams when first starting in Coleman, which was the first coal mining town in Alberta to organize first aid teams. He referred to the unselfish services of Dr. Rose years ago, and also paid tribute to Dr. Borden's services as instructor.

Mr. Kellogg stated that the local branch had a history it might well be proud of, and the members who that night were awarded prizes were deserving of the honor and the publicity attaching to it. He felt that the services of the men were never fully realized and ap-

Summer Travel on the Great Lakes

The Canadian Pacific Railway announces that the company's three passenger ships, plying the Great Lakes from Port McNicoll to Port William, will commence their summer sailing schedules on May 4 from Owen Sound and from Port McNicoll and Port William on May 23. Thereafter, there will be three sailings weekly, one from Owen Sound to Port William on Mondays, returning Thursdays and two each Port McNicoll to Port William Wednesdays and Saturdays and eastbound Port William to Port McNicoll same days. The announcement opens an alluring vista of attractive trips for the tourist who wishes to combine beauty of scenery with cool travelling under luxurious conditions in the sweltering summer days that are now approaching. These vessels, S.S. Asiniboula, Kewatin and Manitoba, are well appointed boats offering every comfort to travellers and their route is through the Georgian Bay, Lake Huron, the Sault Ste. Marie locks where there is a rise of about 20 feet to Lake Superior which they traverse, and up that vast inland sea to Port William. The passenger travels about 600 miles, spending 39 hours on the waters of these lakes, often out of sight of land, and getting the beneficial effects of an ocean voyage. Dandling, plenty of space, strolls along promenade decks, cozy cabins, well-appointed dining-salons, glimpses of ever-changing and beautiful scenes, fit every taste and combine to make up a trip that will linger long in the memory. Travellers who are thinking of a journey across the continent from east to west, or vice-versa will find the trip on the Great Lakes makes a most welcome change in the monotony of rail travel. Lay-out shows Canadian Pacific ship ready to sail from Port McNicoll with passenger train alongside, and passing Thunder Cape, impressive beauty spot on Lake Superior.

preciated by the general public. Accidents were far too frequent in the mines, and he asked the miners present to give more thought and use more safety first rules to reduce the frequency. He knew of instances where first aid men by prompt work had saved injured men from permanent injury, and they and their instructors were far more deserving of encouragement than is generally extended.

Dr. Borden in acknowledging his presentation extended his thanks and remarked on the pleasure it gave him to work with such a fine bunch of fellows as those in the first aid classes. He had a man under his care now who, if he had not received first aid would possibly have lost his life. All honor to the men who gave of their time to the work.

The evening closed with a chorus by the glee club, which has made great improvement under the leadership of Mr. J. R. Roberts.

The programme included overture by Mason's orchestra, selections by Coleman Glee Party, under the able conductorship of Mr. J. R. Roberts, violin solos by T. Hill, solos by Mrs. Ashbridge, Miss Irene James, Alf. Phillips, George Hibbert, tenor and bass duet by Reuben Johnson and George Hib-

bert, Johnson possessing a surprisingly good bass voice for a young man; saxophone solo by Joe Janostak, pianoforte duet by J. R. Roberts and T. Elgar Roberts.

Success Goes to Those Who Persist

There is business to be secured by retailers in Coleman who make the steady effort every day to interest people. Records for 1930 shows it has the largest postal revenue in the Pass towns, and is among the largest of the towns of the province. This being proved, there should be more retail business transacted than has been for some time. A searching analysis among retailers is required to determine methods to stimulate retail buying. There is business to be done and it is the man who grasps the opportunities that exist who will reap the benefit, despite the croaking of those who may sit down and remain passive in the face of a greater need to day for aggressive action than during the years when business just naturally came their way. You must either forge ahead or eventually drop out of the race. And nobody will extend any sympathy should you be outdistanced in the race.

The article in Maclean's Magazine, current issue, of the development of Clark's family business in the production of canned goods is inspiring in showing what can be done in building business. Of course, advertising played its part, as it has in all successful business enterprises.

You cannot get away from the indisputable fact that "It Pays to Advertise!"

ST. ALBAN'S CHURCH

Next Sunday, the 5th after Easter, the services will be:
2 p.m. Sunday School.
8 p.m. Adult Bible Class.
7 p.m. Evensong and Sermon.

The Caledonian Society held a very enjoyable social last Friday evening, a program of songs, followed by dancing, filling out the evening.

Stole Blankets—Paid Dearly for Same

Quick action by Coleman and Fernie police resulted in three young men being brought before J. Ford, J.P., charged with stealing blankets and other articles from the Empire hotel, Coleman. Leaving early in the morning, they travelled by their own car to Fernie. On the theft being discovered, Chief Houghton wired to Fernie and the police there captured the three as they were about to leave for the west. They were brought to Coleman, and paid in fines and costs over \$40. They had quite a sum of money on them, partly in travellers cheques, and stated they came from Edmonton. Their ages were 30, 28 and 21 years.

Fine Meeting at Brocket Indian School Wednesday

A most enthusiastic meeting of clergy and laymen of all parishes in Macleod Diocese was held at St. Cyprian's school on the Peigan reserve last evening, at which addresses were given by Bishop Sherman, Alan C. Fraser of Calgary, Rev. F. Randall Powell of Macleod, Canon Merrick of Clareholme, and Archdeacon Swanson, Lethbridge. Coleman was represented by Rev. A. S. Partington, B.A., Major R. F. Barnes, A. L. Watkins and H. T. Halliwell; Blairmore by T. Hills, Corporal Weaver, J. Packer and Mr. Griesbach.

Time does not permit of a complete report but further details will be published next week. A splendid supper was provided by Rev. W. Barlow, superintendent of the home, and Mrs. Barlow, for which Bishop Sherman, on behalf of the gathering, extended hearty thanks.

Miss Margaret Allan has returned for the summer from Alberta University, Edmonton.

Felix Brennen visited Bill Fraser on Monday, stopping off on his way from Port Arthur, where he played hockey the past season, and leaving later for his home at Trail.

Workers of Pass Towns Unite in May Day Demonstration at Blairmore

Coleman Contingent Addressed by Comrade Farbey and
March With Red Banners—Fine Weather Favored
Holiday for Workers

May Day demonstration under the auspices of the Unity League of the Communist Party was participated in by workers from Bellevue, Blairmore and Coleman in a mass meeting at Blairmore, and passed off in an orderly manner.

At Coleman an open-air meeting was held outside the post office at 1 p.m., which was addressed by J. Farbey, of Calgary, who appealed to the workers to unite and fight to remedy the grievances under which they are suffering. He emphasized the importance to the working classes of International May Day, reminding them that it was the 45th anniversary dating from May 1 demonstrations in Chicago in 1886.

Many had suffered for the rights of the workers and had been thrown into jail, but still the fight will go on until the evils of the capitalist system are abolished and every man who wants to work will be able to on a wage which will be a life-fact of dignity.

Protests were so strong they had seen to it last year that employment would be provided, but what had been the result so far? Unemployment had increased and there was no improvement in sight.

He exhorted the workers to stand for solidarity of the workers and lauded the efforts of the Russian workers, whom he stated were fighting not only their own battles but were striving for better conditions for workers throughout the world. It was up to the workers to support them if they wanted to bring about an improvement in their own conditions.

Compared with what leaders had suffered in their fight on behalf of the workers, they were asked to make sacrifices small in comparison.

son. The capitalistic class are keeping the workers down, and they must unite if they were to get what they were entitled to.

He urged every man to join in the march to Blairmore, and demonstrate that they were in earnest in their demands. On the conclusion of his address, he was given a generous round of applause, and the procession was formed, a number of women joining in the parade.

Several red banners with inscriptions were carried, and a white banner by the women, and about 200 marched from Coleman to Blairmore, where addresses were given by a Mr. Bruce, John Stuklak and others.

The day passed off without any untoward incidents, and though the police forces were added to by others coming from towns further east, there were no trouble incidents to be dealt with.

On Sunday, Mr. Bruce of Toronto, addressed a meeting in Coleman opera house.

Dr. Carpenter Will Speak on Technical Education Monday

At 7:30 p.m. on Monday in St. Alban's parish hall Dr. W. G. Carpenter, of Calgary Technical Institute, will explain the principle of technical education with particular reference to the needs of the schools in Coleman.

This very important subject should interest vitally the people of Coleman and there should be every effort made to hear this address. The meeting is sponsored by the school board and ministerial association of Coleman.

Don't Be Disappointed This Time

GAS

relieved

WHAT most people call indigestion is usually excess acid in the stomach. Food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude bastes. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention, it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

(Made in Canada)

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate with no harmful after-effects.

Once you learn this perfect way you'll never deal in any other manner with the headaches, gas, bloating, nausea, dizziness, indigestion, biliousness, etc., due to an over-acid stomach and bowels.

Be sure to get genuine Phillips' Milk of Magnesia. The name Phillips on the bottle. All druggists sell it—50c.

The Canadian Constitution

Is the constitution of the Dominion of Canada, being the British North America Act, 1867, of date?

Recent decisions by the higher Provincial courts of law, the Supreme Court of Canada, and the Privy Council all give point to the question.

In other words, is a hard and fast written constitution drafted in the eighteenth-century of the nineteenth century, long before the days of the automobile, radio, airplanes, and modern big business suitable to our present and authority as to the Dominion of Canada? The constitution of the Dominion of Canada is a document of the past, and the various Provincial Legislatures on the one hand, and the Dominion Government on the other, are in a constant struggle to carry on our public business today, not to mention possibly even more complicated developments in the years to come?

Unlike Great Britain, which has no written constitution but is governed by a Parliament guided by precedent but upon precedent down through the ages, and which is, therefore, free to meet changing conditions as they change, Canada is not so fortunate.

Furthermore, among all the self-governing Dominions of the Empire, Canada alone does not possess the power to amend its own constitution. That power rests solely with the Parliament of Great Britain.

The constitution of Canada was drafted just as the great American civil war was drawing to a close, and the Fathers of Confederation had ever in mind the conflict which arose in the republic to the south between the Federal authority and the advocates of State rights. The constitution of the United States is founded in the principle of State rights, and the Federal Government has authority in regard only to those matters specifically delegated to that Government. Where no specific delegation of authority as between the Federal and State authorities is made, then the authority automatically rests with the State. The Civil War resulted from the contention of the southern states that the Federal authority was interfering with and usurping certain of their State rights.

The Fathers of Confederation consequently drafted the B.N.A. Act on exactly the opposite principle. In Canada, the rights and powers of the Provinces are distinctly set forth and limited, and all matters not so specifically stated belong to the Dominion.

There are, however, certain subjects in regard to which authority is divided, as, for example, incorporation of companies. The Provinces possess the power to incorporate companies for purely Provincial purposes, while the Dominion can incorporate for Dominion purposes. Both are intensely jealous of their rights in this respect, and, as a result, there is continual dispute. For example, most Provinces are anxious to curb the stock-selling activities of corporations, and to bring them under strict government supervision and control. They have, therefore, enacted what are commonly termed "blue-sky" laws. But the Dominion has contended that such any company desirous of evading such Provincial restrictions takes out a Dominion charter.

There has now arisen a dispute between the Dominion and the Provinces as to which authority exercises control over radio broadcasting and reception. The Dominion has exercised that right to date, but it is now challenged by the Provinces. Suppose it should be established by a Privy Council decision that the Provinces are in the right and the Dominion wrong, under the old B.N.A. Act, would it be a good thing for Canada to have radio control cut up into nine pieces?

As a matter of fact, in a country of immense distances, divided by natural geographical barriers, it is not surprising that the life of our national life that, in regard to many matters, lack of unity results because of Provincial jurisdiction in such matters which would be overcome through unified Dominion control?

On the other hand, there is the tendency on the part of Ottawa to take control over, or interfere with, subjects which are clearly matters for the Provinces. Constitutionally speaking, such a matter as Old Age Pensions belongs to the Provinces, but by enactment the Dominion Parliament decreed that it would contribute a certain proportion of such pensions if the Provinces adopted the plan. Some of the Provinces have done so; others have not. Such a pension system once established by a Province cannot easily be done away with, but the Dominion is not willing to permit the Dominion from repudiating its enactment at any time thus leaving the Provinces to face the whole of the financial burden. Similar action has been taken at times by the Dominion in such matters as highways construction, technical education, and grants for this and that. Provinces have embarked on these enterprises, only to have Dominion assistance withdrawn later, to the financial embarrassment of the Provinces.

The question that naturally arises is: Has the time not arrived when the constitution of Canada should be overhauled and brought up-to-date? Should not representatives of the Dominion and of the nine Provinces meet in conference and consider the whole subject with a view to clarifying the atmosphere and removing so many of the causes of present constitutional cases before the courts? And is Canada not just as capable of amending its own constitution as is Australia, South Africa, or the Irish Free State? Or must we remain in the eyes of the rest of the world as an inferior Dominion?

Fortunate Winners

H. F. Underwood, of Palatka, Fla., himself won a golf cup he had sold to a club, although he had never played the game before. Almost as good as the incident at the Horticultural Society Show in Brantford, Ontario, last year. Two sweepstake prizes were offered by two members of the directorate, and each won the prize donated and designated by the donor.

The Cutworm Menace

Pale Western Cutworm Eggs Are Hatching In Infested Areas

A recent examination of fields in the area expected to be infested with pale western cutworm has shown that in some cases the eggs are beginning to hatch. This is especially true in the areas that have recently been visited with light rains or snow followed by warm weather.

The hatching of these eggs at this time will answer the question that has been in the minds of many farmers regarding the effect of the open winter on the pale western cutworm. There seems to have been a general impression among the people in the infested areas that the peculiar winter would effectively control the cutworm. This was to be accomplished either by the eggs being killed or the eggs hatching during the winter and the cutworms being killed. There is very little evidence from experimental work to show that either is possible.

The presence of pale western cutworms in the field can be easily determined in those fields which have some vegetation such as wild oats, volunteer grains, grasses or weeds present. The young cutworms feeding on this vegetation will eat holes in the leaves and some leaves may be cut off above the ground. The evidence of feeding is much easier to find than the cutworms themselves since they are at present very small and inconspicuous.

Fields which have such vegetation showing signs of cutworm feeding can not be seeded to crop this fall, but the hope of having it mature under the season turns out to be exceptionally wet. Such fields might better be cultivated thoroughly and worked up as first class summer fallow for next season. Where this latter cannot possibly be spared for summer fallow it should be cultivated thoroughly throughout the early spring and seeded to late barley or oats after the middle of June. The date of this seeding will depend on whether or not cutworms are still active in numbers in the field.

Information regarding the pale western cutworm may be obtained by writing to the Dominion Entomological Laboratories at Lethbridge, Al.; Saskatoon, or Indian Head, Saskatchewan; or to the University of Alberta at Edmonton; the University of Saskatchewan at Saskatoon; or the Provincial Departments of Agriculture at Regina or Edmonton.

FASHION HINT

"How to make my old short skirts conform to the new length was a problem to me until I hit on this plan. I dropped the hem; and as the skirt had been worn for many years was darker than the rest, I redyed the entire dress, after having bleached the goods following directions in the Diamond Dyes package. I used Diamond Dyes for the redyeing, of course. I have dyed many things with these dyes and the results are perfect. They have saved me many dollars and have never failed to give perfect results—smooth, even colors—fast to wear and washing. I think my things are new when I see my old things. I tint them with Diamond Dyes. They do give the most gorgeous colors!"

Mrs. G. C. Levin, Quebec.

American Penetration

Americanization Of British Amusement Industry Is Discussed

Americanization of the British amusement industry was discussed in British House of Commons with a dozen members burling trouble questions at Rt. Hon. William Graham, president of the board of trade.

They asked him if he knew the American Telegraph and Telephone Company and the Western Electric group, through subsidiaries, recently obtained control of the Gaumont British corporation, one of the largest producers and exhibitors of motion pictures in England, and were engaged in an Americanization programme.

Choked For Air. Some little irritant becomes lodged in the bronchial tubes, others gather, and the awful choking or asthma results. Nothing offers quite such quick and positive relief as Dr. J. D. Kellogg's Asthma Remedy. The healing, soothing smoke or vapor penetrates, clears the passages and gives untold relief. It has behind it years of success. It is the sure remedy for every sufferer.

The Miracle Of A Building

"A building is one of our unrecognized miracles. It comes to us out of the unseen. God and man build it together. The wood which forms its substance is a part of the life of great forests; the mind, which sees its form fashions its visible structure out of invisible material; the hands which build its frame have the skill of creative workmanship; the life it shelters grows it with meaning and purpose. Great is the mystery of a building."

W. N. U. 1888

If baby has COLIC

A GRAY in the night. Colic! No hands. This pure vegetable preparation brings quick comfort, and can never harm. It is the sensible thing when children are ailing. Whether it's the stomach, or the little bowels; colic or constipation; or diarrhea. When tiny tongues are coated, or the breath is bad. Whenever there's need for gentle regulation. Children love the taste of Castoria. And its mildness makes it safe for frequent use.

And a more liberal dose of Castoria is always better for growing children than strong medicine meant only for adult use.

Deplores Child Labor

Says Canada Not Fulfilling Provisions Of Versailles Treaty

Charges that Canada was not fulfilling provisions to protect labor, laid down in the Versailles treaty, were made last night by J. S. Woods, north, Labor M.P. for Winnipeg, North Centre, at the annual meeting of the League of Nations Society at Toronto.

Charges covering an eight-hour day, minimum wages commensurate with the living standards of the country in which the worker lives, elimination of child labor and the right of labor to organize, had not been lived up to, he claimed.

According to the census, he said, Canada employed almost twice as many children as the United States. Of every 1,000 persons engaging in gainful occupations, 23 were under the age of 16, while in the United States only 13 under 16 years were employed per 1,000.

Alberta Railways Act

Measure To Extend Time For Two Years For Completion Of Northern Road

Third reading was given in the House of Commons to a bill respecting the Northern Alberta Railways Act.

The object of the measure is to extend the time for two years for the commencement and completion of the main line of the Edmonton, Dunvegan and British Columbia railway from Spirit River, Alberta, by the most feasible route and in a generally westerly direction of a distance of 102 miles, more or less, from the townships 78 or 79, range 18, west of the sixth meridian in British Columbia; and for a branch line of the Central Canada Railway from near Grimshaw, Alberta, in a northerly direction to the northern boundary of Alberta.

It Testifies For Itself.—Dr. Thomas' Electric Oil needs no testimonial of its powers other than itself. Whoever tries it for coughs or colds, for cuts or contusions, for sprains or burns, for pains in the limbs or body, well know that the medicine proves itself and needs no guarantees. This shows why this Oil is in general use.

Awarded Research Council Bursary Miss Edith May Lyons, of the department of zoology, University of Manitoba, has been awarded a bursary by the National Research Council of Canada. Miss Lyons is qualifying for her master of science degree this spring, and will continue work with post-graduate research work at the University of Toronto next year.

Sweden's railway electrification programme is expected to prevent a national unemployment problem for at least two years.

Presented With Horses

Mounted Policemen At Empire Trade Fair At Buenos Aires Receive Gift

Four Royal Canadian Mounted policemen now on duty in the Canadian pavilion at the British Empire trade fair in Buenos Aires, have each been presented with two riding horses for their personal use. A cable to this effect, received at the Department of Trade and Commerce from Buenos Aires, does not make known the donor of this munificent gift but it is believed the eight horses were presented by the Argentine government.

The four members of the R.C.M.P. sent to the trade fair are: Sergt. J. R. Paton, M.C., of Victoria, B.C.; Constable Carstairs, of Medicine Hat, Alberta; Constable Carruthers, and Constable C. G. Fairman, both of Ottawa.

Previous reports from Buenos Aires said the four "Mounties" had captured the popular fancy in Argentina, a country noted for its horsemanship.

Recipes For This Week

(By Betty Barclay)

COCONUT CABINET PUDDING

5 egg yolks, slightly beaten.
5 tablespoons sugar.
1/4 teaspoon salt.
2 cups milk.
1 tablespoon gelatin.
1/4 cup marshmallows.
1/4 teaspoon vanilla.
Lady fingers or strips of cake.
1 1/2 cups apricots, sliced.
1 cup coconut, southern style.
Combine egg yolks, sugar and salt with 2 cups milk and cook in double boiler until mixture coats the spoon, stirring constantly; soak gelatin in 1/4 cup milk 5 minutes and add hot custard. Stir until gelatin dissolves. Add vanilla. Strain custard into mold, filling 1 1/2 inches deep. Chill until firm. Dip lady fingers into part of custard mixture and line sides of mold. Fill center of mold with alternate layers of apricots, remaining custard and coconut. Chill until firm. Unmold. Garnish with additional apricot halves, whipped cream, and strips of angelica. Serves 8.

Wood Buffalo Park

More Than 1,500 Buffalo Counted and Photographed In Aerial Survey

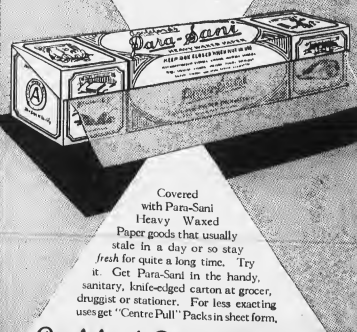

More than 1,500 buffalo were counted and photographed in the Wood Buffalo Park, at the junction of the Saskatchewan-Alberta boundary and the Northwest Territories, by the aerial survey of the grazing lands of the far north, just completed. There was no attempt to photograph the whole herd in this census, which was in the nature of a preliminary test and experiment.

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

B.C. Peach Culture

It is expected that about 20,000 new peach trees will be planted in the Oliver district of British Columbia this year.

Foods Stay Fresh Longer This Way

Covered with Para-Sani Heavy Waxed Paper goods that usually state in a day or so stay fresh for quite a long time. Try a Get Para-Sani in the handy, sanitary, knif-edge carton at grocer, druggist or stationery. For less exciting uses get "Centre Pull" Packs in sheet form.

OTTAWA PASSES ESTIMATES FOR PUBLIC WORKS

Ottawa, Ont.—The House of Commons buckled down and spent a solid day discussing and voting upon Public Works Department estimates were under consideration, with particular reference to votes for public buildings in Ontario and Quebec. While there was plenty of criticism from varying angles, fair progress was made. When the House rose a total of \$2,239,150 had been voted, covering appropriations for the provinces of Ontario, Manitoba, Saskatchewan, Alberta, and British Columbia. When adjournment came the House had under consideration the general appropriation of \$562,300 for buildings in different parts of the Dominion.

Estimates for public buildings in Ontario, totalling \$1,749,400 were passed. The corresponding vote of a year ago was \$2,616,323 and of this, \$179,000 was revoted. The estimates include \$670,000 for the Toronto customs building.

A. L. Deauble (Lib., Provencer), aired a grievance when the Manitoba vote was called. The 1930 estimates passed by the King administration contained \$12,000 for a post office at Dominion City, Man. After the change in governments, the work was not proceeded with.

Hon. H. A. Stewart, minister of public works, stated that the course followed in this instance had been sound. The member himself had said that the annual revenue would be \$1,300. The salary of the postmaster would absorb this sum and the post office would have to be maintained, interest paid on the money, repairs made and there would be a general debit against the building.

A. A. Heaps (Labor, Winnipeg North), agreed with the minister of public works in opposing the erection of public buildings which did not produce revenue.

The House then approved the appropriation for public buildings in the province of Manitoba which totals \$81,700.

Proceeding to the Saskatchewan appropriation which totals \$176,050, the House quickly ran through the individual items. They include, \$38,000 for a public building at Watrous, \$28,000 for a public building at Kam-sack, \$22,000 for one at Lumsden, and \$31,000 to pay the third instalment on the purchase of the Regina armories.

A protest against reduced estimates in the prairie provinces, as compared with amounts provided in Eastern Canada, was voiced by T. P. Donnelly (Lib., Willow Bunch). The unemployment was worse in the western provinces, he asserted, and the provisions for public buildings showed a far greater reduction there than in the East.

Mr. Stewart stressed the large number of claims which had been made upon the department of public works. He had to be very careful in view of the many demands, Mr. Stewart referred to the construction under the previous government of an immigration hall in Mr. McIntosh's constituency. Today this building was not needed and about the only use it could be put to was possibly occupation by the military. Discretion consequently must be exercised so that no mistakes would be made.

The estimates for Saskatchewan and Alberta were then passed.

Firmer Hand In India

Believed That Lord Willingdon Will Inaugurate Stiffer Policy

London, England.—Lord Willingdon takes up residence at the summer capital of India this week-end and it is generally believed he will inaugurate a policy somewhat stiffer than that of Lord Irwin.

Sir Geoffrey Demontmorancy, governor of the Punjab, said recently that the Punjab government's policy of toleration had been lenient, and would not be continued. The Punjab government, he said, would no longer stay their hand, but would deal properly with breaches of the law. The situation in the other Indian provinces is similar to that in Punjab.

Fishing Ships Forfeited

Ottawa, Ont.—Four ships of United States registry are condemned as forfeited to the Crown for fishing within Canadian territorial waters on the Pacific Coast, under a judgment handed down by the Supreme Court of Canada recently. The judgment confirms the findings of the local judge in admiralty at Victoria, B.C.

W. N. U. 1888

Searching For Lost Explorer

Ship With Airplane Carrying Provisions Has Left Iceland
Copenhagen, Denmark.—A wireless message received at Reykjavik, Iceland, purporting to be from Augustine Courtault, British scientist who is lost in Northern Greenland, stated: "Absolutely without provisions."

An aeroplane which has left Iceland with the Iceland inspection ship "Odin," will fly from the edge of the ice barrier to Taslaok and to Angmagalik, searching for Courtault en route. If the plane can find him it will drop provisions on the ice for his use.

He is believed to be somewhere in the vicinity of the station at which he was left to spend the winter and obtain meteorological data for use of British Arctic air route expedition. The site of this station has not been located thus far by rescue missions which have gone to Courtault's aid.

Heavy Grain Shipments

Nearly 30 Million Bushels Sold For Immediate Export

Montreal, Que.—Nearly thirty million bushels of grain have been sold for export during the next four weeks, and nearly 50 tramp steamers chartered to carry it across the Atlantic, together with the regular liners. Reports of conditions prevailing during the early part of the St. Lawrence season are steadily improving.

Grain freighters have improved and one steamer was booked last week to carry 30,000 quarters of grain to Havre and Dunkirk during the first half of May at 12 cents a hundred pounds. The rates are below what shipowners consider normal though higher than those prevailing during the greater part of last season.

Preparing For Flight

Bert Hinkler, Australia Flyer, Inter-viewed

Toronto, Ont.—Bert Hinkler, skilled Australian flyer, who set the first record for the London-Australia flight in a light machine in 1928, is now at a local airport here, and much conjecturing as to his immediate plans is being made by local men.

Interviewed by a local newspaper, Hinkler did not deny that he was going somewhere, but refused to discuss the matter of a flight.

It is believed, however, that he will suddenly decide to fly to South America, thence across the South Atlantic, or perhaps fly to Australia via Vancouver. A North Atlantic hop via the northern route is also suggested as a possibility.

Grain Probe Report

Report Containing 40,000 Words To Be Tabled In House Of Commons

New York, N.Y.—The work of the Royal Grain Commission, appointed by the Canadian government to decide whether or not trading in grain futures is injurious to the interests of the producer, came to an end as its members signed the report aboard the "Mauretania," just before she sailed for England bearing Sir Josiah Stamp, noted economist, who served as chairman of the commission.

The report, which, members said, is about 40,000 words in length will be taken to Ottawa by the Canadian secretary to the commission, and it is expected, will soon be tabled in the House of Commons.

Thresh Last Year's Crop

Saskatoon, Sask.—Threshing will be completed in the territory around Prince Albert this week, according to T. F. Moltard, travelling superintendent for the Pool Elevators, who has returned from an inspection trip in that area. Due to wet weather last fall and the October snow storm a considerable quantity of grain remained in the stock. This grain has wintered well and is for the most part grading straight.

War Claims Heard

Ottawa, Ont.—A total of 457 cases have yet to be reported by the war claims commissioner, Errol McDougall, Montreal, of which 308 claims have already been heard, leaving a balance of 149 cases. If, however, jurisdiction is admitted in the claims arising out of the Armenian massacres, which were filed in 1920-21, there will be an additional 271 cases yet to be reported on.

Many Deported

Ottawa, Ont.—Of those who came to Canada under the 1,000-family scheme, 568 persons, including men, women and children have been deported. Hon. W. A. Gordon, Minister of Immigration and Mines, gave this reply in the House of Commons to a question by H. E. Spencer (U.F.A., Battle River).

Princes Welcomed Home

Prince Of Wales and Prince George End Long Journey

Windsor, England.—The Prince of Wales and his brother, Prince George, ending an 18,000-mile trade mission to South America, returned to the family hearth and were joyfully welcomed by the King and Queen.

Their arrival at Windsor Castle from Paris after an absence of three and a half months was the occasion for a happy family reunion. Their parents and the Duchess of York, greeted them enthusiastically. Princess Elizabeth, their niece, threw her arms about their necks and gave them each a loud kiss.

Prospects Good For Cattle Shipments

Increased Demand From Great Britain Is Indicated

Montreal.—Shipments of Canadian cattle to Great Britain are being well maintained and evidence indicates that there will be an increased demand from Great Britain as the season progresses. The first shipment from Montreal this season left April 30, aboard the "Manchester Commerce," taking 442 head, while seven other lots are booked for May and June. All shipments will average around 400 head.

ACTION TAKEN BY FRANCE WILL AID SALE OF WHEAT

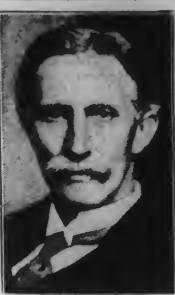

Winnipeg, Man.—France's increase in the percentage of foreign wheat to be mixed with the domestic product will "help a little" in improving exportation of Canadian grain, according to A. P. White, president of the Winnipeg Grain Exchange. France, it is announced, increased the percentage of foreign wheat for mixing to 25 per cent., and Mr. White believed that this move would aid somewhat in decreasing the Canadian surplus but he expected no drastic rise in Canadian exports.

"Any removal of restrictions against foreign wheat on the continent tended to improve Canada's position," Mr. White stated. He also indicated that it would benefit other countries shipping wheat to France. He was unable to state whether the increase in the percentage of foreign wheat for mixing, made by France several weeks ago, had caused any undue jump in Canadian shipments to that country, but he believed the jump to 25 per cent. was bound to relieve the situation in this country slightly.

"Germany," Mr. White revealed, "is at present contemplating the lowering of her tariff against foreign wheat which would aid further in the clearing of Canada's surplus." The European countries, he said, will shortly come into the market for wheat, resulting in a lowering of all tariffs and an increased demand for the Dominion's product.

John I. McFarland, general manager of the Central Selling Agency of the Wheat Pool, believed France's action gave a brighter outlook for the removal of Canada's surplus. Several weeks ago, he said, France increased the percentage and it caused an improvement in export. "The raise to 25 per cent.," he added, "will be welcomed."

NOTED ECONOMIST

Sir George Paish, internationally-known economist, who said while in Montreal: "If the five-year plan succeeds it will mean the end of communism in Russia."

Steamer Beothic Will Make Annual Expedition

May Again Make Attempt To Reach Winter Harbor, Melville Island, Ottawa, Ont.—The annual expedition of the steamer "Beothic" to the Canadian Arctic archipelago will be carried out as usual this year by officials of the Northwest Territories branch of the Department of Interior and the Royal Canadian Mounted Police.

The "Beothic" will leave for the Arctic about the end of July and visit all the northern police posts as well as the various posts where "N.W.T." men are stationed. It is understood there will be another attempt to reach Winter Harbor, Melville Island, to inspect the cache there. This cache was put in over 20 years ago, and while it has been visited by travellers with dog teams, a boat has not called in there since it was established.

On a year attempt to reach the cache was unsuccessful, due to ice conditions.

Value Of Corn Imports

Runs Into Millions and Duty May Be Demanded

Ottawa, Ont.—Canada is importing, for purposes other than distillation, about 12,000,000 bushels of corn worth in excess of \$10,000,000 every year.

This information, given to the House of Commons in answer to a question some days ago, may be the basis of a demand for a duty on imported corn, which now enters the Dominion free.

The corn, brought from the United States, and even from the Argentine to some degree, is used for feeding livestock in the central provinces. It is the claim of some western M.P.'s that the eastern market for feed should be belong to prairie growers of barley and other coarse grains. A demand for the reduction of freight rates on these grains, when shipped for domestic consumption, has already been voiced. A stiff duty on foreign corn may now be asked.

President Of Canadian Press

Toronto, Ont.—M. E. Nichols, vice-president and managing director of The Winnipeg, Man., Tribune, was elected president of the Canadian Press, succeeding John Scott, managing director of The Toronto, Ont., Mail and Empire, who for personal reasons declined a third term.

King and Queen of Siam

King Pradajipok and Queen Rambai-Barni, monarchs of Siam, posed for a photograph aboard their special Canadian Pacific train at Vancouver before starting their trip to New York via the Canadian Rockies and Chicago. Impeded when the Canadian Pacific liner "Empress of Japan" arrived at Victoria and Vancouver after a record-breaking voyage from Yokohama, His Majesty King Pradajipok was unable to receive the official delegation of welcome. His first public appearance was as he walked from the royal suite aboard the big white liner to the waiting royal train parked beside the ship.

Fatal Plane Crash

Two Lives Lost When Machine Crashes At Brandon

Brandon, Man.—The first major plane crash in the history of Brandon brought death to two young air-men when their machine crashed from a height of 1,000 feet and burst into flames near the local aerodrome.

The victims were: William Clark, 21, owner of the plane, and son of Col. and Mrs. F. J. Clark, Brandon, and William Britten, 27, pilot of Wawanesa, Man.

Returning from a flight to Wawanesa, the airman were preparing to land at the aerodrome when the plane swerved into a spin, exploded and burst into flames. Like a rocket, it dived to earth, bringing instant death to the pilot and owner.

It was some time before the flaming wreckage could be approached by airport attendants, and the bodies, entangled in the debris, were charred beyond recognition. Nothing was left of the plane but the bars, twisted steel work.

Hundreds of persons flocked to the scene of the crash, and police had great difficulty in keeping the crowd away from the fire-struck wreckage.

British Economist Gives Opinion On Depression

Might End In Three Months Says Sir Josiah Stamp

New York.—The end of the present economic depression in Canada and the United States will not be in sight before the end of the next three months, Sir Josiah Stamp, noted British economist, told the Canadian Press. The depression will probably come to an end in both countries simultaneously, he said, although recovery in the United States might be slightly more rapid than in Canada.

"I do not want to say the depression will end in three months," he said, "but I will say it can't end before that time. Some time ago I said it would not end before May. It has not ended and I now believe it cannot do so before the end of another three months."

UNEMPLOYMENT INSURANCE PLAN IS FORTHCOMING

Ottawa, Ont.—The government hopes to submit to parliament "at the earliest possible moment" legislation providing for some form of unemployment insurance. A statement to this effect was made by Premier R. B. Bennett in the House of Commons.

The prime minister, however, made it clear that such legislation can only be submitted after careful inquiry and the gathering of the fullest information. The department of finance will act without preliminary investigation. "That course of action would spell disaster; it would bring suffering, not happiness, to those concerned."

The prime minister made one definite declaration. He would never support a system of non-contributory insurance. Canada could not stand a system such as that in operation in Great Britain, with its tremendous drain on the exchequer.

The question of unemployment insurance came before the House in the form of a motion placed on the order paper by A. A. Heaps, Labor member for Winnipeg North. It called upon the government to "take into consideration the immediate establishment of a federal system of insurance against unemployment, sickness and invalidity." He submitted his proposal not as a cure for unemployment, but merely as a palliative, said the Labor member at the outset of his speech. The federal government should "give the lead" to the provinces in such legislation.

The word "immediate" should be deleted from the resolution, suggested Mr. Bennett, and the word "contributory" be included. It was impossible for the government to deal immediately with a matter which might require months of research and actuarial work; also, Canada was about to take a census, and the information then gathered would be of great value in reaching conclusions as to the nature of the proposed scheme. Co-operation of the provinces would be necessary.

Support of the motion was voiced by Mr. King. Modern conditions, involving the use of invention, resulted in men being thrown out of work, and countries were faced with the necessity of providing unemployment relief or unemployment insurance. He favored the latter. If a Dominion old age pensions scheme could be devised, he saw no reason why a scheme of unemployment relief should not also be evolved.

'QUAKE CAUSES HEAVY LOSS IN SOUTHERN RUSSIA

Moscow, Russia.—Further earthquakes in the Soviet Republic of Azerbaijan in Transcaucasia caused fear that the total number of deaths in the widespread disturbances, which started Monday, April 27, may amount to more than 500, already unofficially estimated.

More than 2,000 persons were injured in the original quake Monday, April 27, which wrought great damage in the southern Transcaucasia sections of the Soviet Republic and was felt most severely in Armenia. Today's renewal of shocks occurred in the Zangazur district of Azerbaijan.

Great suffering is reported in many sections and in some places residents have deserted their stricken villages and are living in the open. All communication was disrupted at certain points and authorities are having difficulty determining the exact number of casualties.

The government has launched relief work and provided 500,000 rubles (about \$250,000) for immediate use among the sufferers. Food and medical supplies are being rushed to the devastated areas, where hospital shelters are being erected to care for the most seriously injured.

While no definite estimate of the amount of damage has been made, it is certain to run well over \$1,000,000.

Labor Vote Split

Conservative Candidate Wins In By-Election In England

Ashton-Under-Lyne, England.—Facing a shouting and jeering mob, Sir Oswald Mosley, brilliant young Socialist leader, outbraved the bravest of them, and figuratively snapped his fingers in the faces of more than 1,000 disgruntled electors of the Ashton-Under-Lyne. The demonstration came shortly after the result of the by-election in this constituency was announced. Lt.-Col. J. Broadbent, Conservative, won the seat from J. Gordon, Labor, and A. Young, Mosley's new Party candidate—but had it not been for the Mosley candidate, it appears Labor would not have lost the seat.

Broadbent polled 12,420 votes; Gordon, 11,005; and Young, 4,472. Given even two-thirds of Young's vote, which would be normally expected, Gordon would have won the seat by a slim majority. As it was, the split in the Labor vote was too great a handicap for Gordon.

The constituency has ever been a stormy rock in the political sea. Sir Oswald, with Gordon and Broadbent, won the seat last time waiting for the result. With Mosley versus several women. When the result became known, an angry crowd gathered outside. Gordon was taken out of the building by a side door, under a strong police guard. Mosley, however, went to the front door. He paused at the top of the stairs and gazed defiantly at the raging crowd, who hooted and jeered him.

With hands in his pockets, and a slight smile on his face, Mosley walked slowly down the stairs into the street. The crowd rushed toward him, but he continued walking slowly. Police closed around him and escorted him to his hotel headquarters. Despite the turmoil and the threatening appearance of the mob, Mosley refused to move any farther than his slow, nonchalant walk.

Would Change Naval Treaty Plan

Paris, France.—Difficulty in arriving at an agreement on the exact meaning of the Italo-French naval limitation treaty has led to an unofficial proposal from quarters close to the ministry of marine that France drop the treaty with Italy and each country make unilateral statements as to her naval needs.

Saskatchewan Musical Festival

Moose Jaw, Sask.—Entries are being received in large numbers for the Saskatchewan Musical Festival which will be held here June 1, 2 and 3. It was learned recently from local festival officials. While no definite figures can be quoted at the present time, the entries are stated to be quite up to expectations.

Conference Will Decide

Ottawa, Ont.—The question whether a member of the House of Commons should or should not be compelled to vote in a division will be settled by a conference, whose personnel will comprise the leaders of all groups in the Commons. This was decided when Hon. C. H. Cahen, secretary of state, reverted to the matter.

NOTES AND COMMENTS

Intolerance causes heaps of trouble and ill-feeling. Many fail to recognize that the other fellow has sincere reasons for his opinions, for the religious belief he holds, for his political opinions. They see only one road to travel, and that is the one because it is right for them, they would force others, if possible, to travel.

Centuries have clearly proved that it was never intended we should all think and act alike. It is against the laws of nature. True enough it is the clashing of opinions and by compromise that progress is effected in making of laws and defining a code whereby we may live at peace with each other. But the bigot and autocrat who would deny the right of his opponents to think usually meets with disaster. 'Tis a good thing to place oneself in the other fellow's place and ask the question: "How would I act were I in his place?"

Despite what has been often said, that all are born equal, it may be correct as far as coming into this world without material wealth, but unquestionably some are born with greater capabilities than others. There are bound to be inequalities in life and its rewards. It is mostly through heredity that individuals are endowed with their various qualities for good or evil, though many students will maintain that environment plays an equally important part.

Those who suffer from lack of opportunity or to put it in another way, have not the vision to foresee and grasp opportunities, naturally feel that they are the under-dogs and that life is not treating them kindly. In a period of depression such as the world is experiencing, discontent is rife, because people are in want. The worker blames the capitalist system, and his leaders urge as a remedy the establishment of a system whereby all labor, mental and manual, should be conscripted by the State, on a plan similar to that existing in Soviet Russia.

A new country such as Canada has been developed by individual enterprise, and the Communist propaganda does not find fertile ground, except in urban centres where there are large numbers of unemployed. Yet can these men be blamed for turning to the red flag in an effort to ameliorate their condition? Any man who has a family to support, who cannot obtain work despite his willingness, will turn to anything that holds out a shred of hope, for he gets to the point where he knows he has nothing to lose, and therefore Communism attracts him to its banner.

Great Britain does not ban the Communists from holding their open-air meetings, neither does there appear to be any splitting open of heads. For half a century or longer they have experienced labor troubles, and will continue to. There is some criticism against those who would deny free speech, and even if Communists want to parade, as long as they march in an orderly manner, it is their only way to demonstrate to the world that they are dissatisfied and thereby attract public attention to their grievances.

Mrs. Pankhurst and her militant suffragettes a quarter of a century ago cut things loose in London when they smashed plate glass windows and played rough house generally. Though these tactics are not to be commended, yet in the fight for women's votes they felt they had to take drastic measures to impress upon Parliament that they were in earnest. Mrs. Pankhurst in later life lectured on the Canadian Chautauqua platform, and she was as fine a gentlewoman as the highest in the land.

The moral of it all is, that though you may at times think those of opposite opinions to your own are villains of the deepest dye who would wreck the State if they obtained control, they are mostly just as normal beings as the rest of us; but they have a grievance, and all people of all shades of opinion have grievances at some time in their lives.

Though Premier Bennett has not brought about the improvement in economic conditions in Canada on which he made quite a pre-election noise, he has been almost brutally frank. All parties make promises during an election campaign, but since his election Mr. Bennett has been finding out some plain truths which cause him to ponder.

There is always a tendency to talk too much and think too little. Thought requires concentration or mental effort, but a tongue may wag very freely and yet utter nothing that is of any consequence. A rolling stone may gather no moss, but its different once a rumor starts the rounds. It accumulates to such an extent that finally it falls to pieces.

Rod & Gun Club

The annual meeting of the Rod and Gun Club was held on Sunday, May 3rd, in the council chamber. General business included election and nomination of officers:

Sec.-treas., E. W. Beart, re-elected.
President, A. Phillips, sr., re-elected.

Vice-President, A. Fraser.
Committee: A. Dow, G. Evans, D. Jones, A. Gudmundson, A. Anderson, J. McCullough.

Here and There

Over 1,600,000 lbs. of salmon were caught in the coastal waters and rivers of Quebec last year, or 615,000 lbs. more than in 1929.

Potato shipments from Halifax are now over for the season and have been declared to be the biggest in the history of the port.

Illustrating the growth of tourist travel into Canada, 98,509 foreign cars entered Canada in 1930, while in 1930 the total was 54,099.

At the end of February of this year, official registration of radio sets in Canada totalled 565,737, an increase of \$1,612 over the similar period of last year.

Cadmium, a by-product obtained in the production of zinc, was produced for the first time in Canada early in 1928 at Trail, B.C. Used for plating purposes demand for it has increased very rapidly.

The Province of New Brunswick's largest bond issue was sold at the most favorable price in 22 years when a bid of 99.438 was accepted for \$5,215,000 4½ per cent. 30-year bond issue, making the interest cost to the province 4.52 per cent.

New bridges to span the St. Lawrence and other rivers are to be built by the Quebec Government this year at a cost of \$8,000,000. They will be built at points that will link up the highways in the province into a whole.

First large cattle consignment to move east since November, 15 cars or 222 head of cattle for export to Great Britain, left Winnipeg by special Canadian Pacific train which included 27 cars of stock, including 22 cars for eastern Canada points.

A single British Columbia Sitka spruce may contain 3,000 to 10,000 feet board measure of lumber. Lumber used in building an ordinary five-story-roomed frame house is estimated at 15,000 feet, hence two good-sized Sitka spruce trees would suffice for the house.

Crowds estimated at 500,000 people watched the Empress of Britain sail down the Clyde from her birthplace at Clydebank to undergo trials. The ship was escorted by six tugs, a police launch and six airplanes. This \$15,000,000 ship was built for a speed of 24 knots and has already done 26 knots in preliminary trials.

Ten minutes terminal stop at St. Ignace, Ont., and a chance greeting between G. C. Hay and William Ardell, Canadian Pacific mechanic, spanned 45 years of separation and silence between Ardell and his family. It appeared in conversation that Hay was Ardell's nephew and the latter will now visit his family in Vancouver where he has not seen for nearly half-a-century.

The Bay of Fundy steamer Princess Helen will have her first summer season this year and with the opening in June of the Lakeside Inn, new C. P. R. hotel at Yarmouth, heavy tourist traffic is looked for through Saint John from both the United States and Canada. The Cornwall Inn at Kentville and the Pines at Digby will also attract a large influx of visitors.

A total of 1,066 moose and 10,873 deer were taken by hunters in the New Brunswick woods during the past hunting season, bringing the total for the past ten years to 12,614 moose and 60,332 deer, according to the report of the Game Warden of the Province.

Announcement has been made by the Canadian Pacific Railway company that shipments of freight at eastern points for points west, via Port McNicoll, will now be accepted subject to delay at Port McNicoll pending the first sailing. There will be five Canadian Pacific steamers on Great Lakes service during the coming season.

"Given a year of peace and China will become a dominant factor in enormous trade developments between Great Britain and Europe in the Far East," says Sir Ernest Thompson, prominent British cotton manufacturer, who returned from a British economic mission to China aboard the Empress of Canada recently.

The majority of the directors of the Saskatchewan Poultry Pool Ltd., are women, and for several years they have directed the Pool with conspicuous success. For the year to January 31, 1931, the Pool did a gross turnover of \$12,000 according to the report of president Bertha Holmes, an increase of 9 per cent over 1929 and 64 per cent over 1928.

May Harness Natural Gas Going To Waste In Turner Valley To Generate Electric Power

Millions of feet of natural gas now going to waste every day in the Turner Valley, Alberta, may be harnessed to generate electric power for industrial and domestic purposes. A proposal to do this has been submitted to the Alberta Government by a British corporation, according to press reports. It is stated that the corporation offers to spend \$100,000,000 on the project at the outset and a total of \$100,000,000 within 15 years and to begin work on the construction of a plant within 90 days from the time the approval of the Alberta Government is given to the proposal. The plant will be capable of generating 700,000 horse power of electricity within a year.

The plan for this new project, as outlined, is to collect the waste gas in Turner Valley into one pipe line running to the power house where it would be used to turn specially-designed turbine wheels for the generation of electrical power for which a market would be secured in industrialization of southern Alberta. The power house would be located at a point probably 30 miles east of Turner Valley and it would not depend alone on gas from Turner Valley but would utilize also gas from other fields. The corporation proposes, it is stated, to offer the electric power generated for sale in the provinces of Manitoba, Saskatchewan, Alberta and British Columbia, and also in the border states of the United States. The Government of Alberta is asked to pass legislation compelling all oil companies or individuals, whose gas is escaping and not being put to use, to supply the corporation with such gas at a price to be fixed through the Public Utilities Board. In consideration for the establishment of such a plant as proposed, an exclusive franchise for a period of 99 years to the corporation is requested. Provision would be made, if desired, for the Alberta Government to take over the plant on an equitable basis at some time in the future.

The scheme for utilization of the Turner Valley and other waste natural gas would produce electric power at a cost of about three-tenths of a cent per kilowatt-hour.

FARM MANAGER

A. R. Judson, who is farm manager of the Dauphin zone for the Canada Farm Finance Corporation.

Saskatchewan Coal Mining

New Regulations Governing Leases Are Made Public

Reduction in the maximum, and increase in the minimum area allotted to any one lessee is provided for in the new coal mining regulations as published in the April 15 issue of the Saskatchewan Gazette.

Under the old Dominion government regulations the maximum area allowed was 2,560 acres, while the minimum was 20 acres. Only one location was allowed to any one person.

The new regulations provide for a maximum area of 640 acres in any one location, but provide for three locations to a person. Thus the total area provided for under the new scheme is 1,920 acres. The minimum size of a location is 40 acres.

There are little other changes in the regulations, except that under the present plans, any lessee must have a clear sheet with the department before he can obtain a new location or have an assignment registered.

Trans-Canada Highway

Desirability Of Linking Up East With The West Is Pointed Out

The desirability of linking up the incomplete portion of the trans-Canada highway is the subject of a letter sent to Premier R. B. Bennett recently by the western division of the Canadian Automobile Association.

The association stresses the fact that hundreds of thousands of Canadians, regardless of politics, realize the vast possibilities in the completion of the highway at the earliest possible time, because it will provide an artery for a tremendous volume of tourist traffic which now must make use of the United States highways in their passage from east to west.

"There is no estimating the number of Canadians," the letter reads, "who are looking to the day when the Big Bend connection between Revelstoke and Golden, B.C., will be completed. But they are more in doubt in regard to the 500-mile span in western Ontario, which may be regarded as the bridge between the east and west."

Canadian Zinc To Europe

Twenty-Three Cars From Northern Manitoba Shipped To London And Hamburg

The largest shipment on record of made-in-Canada electrolytic zinc is en route from a large smelting plant in Northern Manitoba to London and Hamburg. The shipment was composed of a 23-car train destined to Halifax, Nova Scotia, thence overseas. Fifteen cars are billed to London, and the remainder to Hamburg.

Since the first shipment left the smelting plant at Flin Flon last November, no less than 247 cars of blister copper and zinc have been shipped. Of this total 99 cars have been blister copper and 148 have been zinc. Most of the shipments have been consigned to eastern Canadian centres and to the United States.

Grist Mill For Moose Jaw

Western Grist Mills Limited of Moose Jaw has started the erection of a 100 barrel mill and expects having it completed in time to handle the 1931 crop.

Trade With China

Canadian Products and Exporters Held In High Regard In Shanghai

Canadian products and exporters held in high regard in Shanghai, Canada has suffered less than that of most other countries from the general world depression, according to Lieutenant-Colonel L. M. Cosgrave, Canadian trade commissioner at Shanghai, who is in Vancouver to spend several weeks conferring with importers and exporters and to make an intensive study of coast and western products suitable for the Chinese trade.

Canadian products and Canadian export houses are held in high regard in Shanghai and other parts of China. Their standing is at least equal to that of any foreign country and there is a distinct feeling of friendliness which augurs well for the future, Colonel Cosgrave reports.

"In the past six months there has been more inquiry for Canadian products than in any six months in the past five years. With conditions as they are this can only be regarded as most encouraging," he said.

Frog Farm Builds Up World Trade

Was Started Eight Years Ago On Outskirts Of Vancouver, Washington

A frog farm on the outskirts of Vancouver, Washington, has proved to be such a success that the owner is called upon to deliver frogs faster than the frogs come up out of their winter hibernations in the mud to be shipped to New York or perhaps Australia.

Since the farm was started eight years ago, two of the biggest patrons have been Florida and Louisiana, which were former prolific frog lands. Much of the trade of the farm is in sending pairs of mature frogs for the purpose of starting other frog ponds.

Superfluous Words

"Her observations covered 145 schools in fifteen different States. Why 'different'?"

"Personally, I don't think so." Why "personally"? Do you mean that officially you do think so?

"This line is to be linked up with that one." Why "up"?

FASHION

No. 273—For Smart Matron. This style is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust measure. Size 36 requires 4 1/2 yards of 36-inch material with 3/4 yard of 10-inch lace and 3/4 yard of 35-inch lining.

No. 232—Jacket Suit. This style is designed in sizes 16, 18, 20 years, 36, 38 and 40 inches bust measure. Size 36 requires 3 1/2 yards of 36-inch material for jacket and skirt with 1 1/2 yards of 39-inch material for blouse and jacket bands.

No. 346—Expresses Good Taste. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3 1/2 yards of 36-inch material.

No. 244—For Wise Maiden. This style is designed in sizes 2, 4 and 6 years. Size 4 requires 1 1/4 yards of 36-inch material with 1 1/4 yards of lining.

No. 661—For Smart Junior. This style is designed in sizes 8, 10, 12 and 14 years. Size 8 requires 1 1/2 yards of 36-inch material with 1 1/2 yards of lining.

yards of 38-inch material with 3/4 yard of 39-inch contrasting.

Our large Fashion Magazine shows the latest Paris styles for Spring and Summer for adults and children. Also instructive lessons in sewing.

Preparing Attractive Display

Quebec Is Taking Large Space At World Goods Show

His Excellency the Governor-General has consented to act as chief patron of the world grain exhibition and conference which will take place at Regina in the summer of 1932.

One of the most attractive displays in the education section of the exhibition will be that from the Province of Quebec. It has been decided to take a space of 200 feet frontage in the exhibition building in order to give the thousands of visitors an idea of the agricultural activities of Quebec.

The centre feature of the exhibit will be a Quebec farm, complete with buildings, live stock, fields, sugar bushes, etc., flanked on either side with exhibits of natural resources of the province, including mineral, lumber, power development, handicraft and manufacturing products.

Argentina is the sixteenth country to officially accept the invitation of the Canadian Government to attend the Exhibition and Conference. The complete list of participants at present is as follows: Italy, Peru, Yugoslavia, Guatemala, New Zealand, Czechoslovakia, The Netherlands, Belgium, Poland, Siam, India, Portugal, Switzerland, Estonia, The Philippine Islands and Argentina.

No Hearsay Evidence

Court Case That Was Settled In Common Sense Way

It is well to see things done in a sensible way. To illustrate: In an Eastern city there was a queer case in court. One farmer claimed that a fire started in the bush by his neighbor, had spread to his property and had spoiled the land by burning off the top part of the soil.

Instead of arguing for days, officials, solicitors, and witnesses, took a trip out to the property in question, and along with them they had spades and shovels. They actually went to work and gouged holes in the ground to see if the damage was as serious as claimed, and to find out exactly what had taken place. Returning to court, the decision was made that the fire damage claim had not been sustained.

That was direct action and common sense.

Not Looking For Miracles

Western Farmers Will Fight Way Back To Prosperity

"Twenty-five years from now we will be growing a good deal more wheat than today, and selling it in the world markets," said Hon. Duncan Marshall, one-time minister of agriculture in the Alberta Government, addressing the Eastern Canada Livestock Union at Toronto.

"Taken as a whole, I can say to you that the farmers in the Canadian West are not looking for any miracle to happen, or anybody to turn the country's economies upside down. They are going to win through to better days, as they have fought through earlier depressions," he declared. Mr. Marshall had just returned from a month's motor tour through the West.

Did Not Choose To Speak

A young woman who wished to engage Calvin Coolidge in conversation, when he was president, told Mr. Coolidge that her father had laid a wager that she couldn't get him to utter three words. She expected that this would start him talking. But he said quietly: "Dad wins"

"According to the committee of the National Research Council on tuberculosis research, much work remains to be done before the problems of an effective vaccine against tuberculosis are solved."

This statement was issued following an important conference on the subject in Ottawa, in which the leading doctors specializing in the study of tuberculosis took part.

The statement agrees "B.C.G." confers a degree of resistance to tuberculosis but the nature and extent has not been clearly demonstrated. Further studies are to be conducted to clear up these points definitely. About 1,600,000 infants have been vaccinated against tuberculosis. "B.C.G." is the vaccine of the Pasteur Institute of Paris.

The statement describes the work accomplished as follows: "B.C.G." (named after Prof. B. Calmette, the director of the Pasteur Institute and his colleague, Guerin), has to date been used in various countries to vaccinate a total of approximately 1,600,000 infants against tuberculosis. In the effort against bovine tuberculosis it has been put forward as a preventive measure that would eventually make unnecessary the expensive method now commonly employed of destroying animals reacting to the tuberculosis tests.

"Canadian researches on tuberculosis have been widely discussed in both Europe and America, particularly those of Dr. E. A. Watson, of the national diseases research station, Dominion Department of Agriculture, at Hull, Que., who has challenged claims put forward by Calmette; Dr. A. C. Rankin, of the University of Alberta, and Dr. J. A. Baudouin, of the University of Montreal, whose work has tended to support Calmette's contention, and Dr. G. B. Reed, of Queen's University. Dr. Watson and Dr. Rankin have carried on extensive experiments with cattle, and Dr. Baudouin has supervised the inoculation and study of infants in Montreal.

"Dr. Reed has recently made an important contribution to the knowledge on the subject and will publish his results shortly."

Dr. R. S. Ferguson, director of the First City Hospital, Saskatoon, Sask., reported on the tuberculosis investigation that has been carried on under the auspices of the committee among the Indians of that district. He said that a family history of the Indians showed that within three generations there had been deaths from tuberculosis in nearly every family on the reserve. The worst tuberculosis epidemic was between the years 1890 and 1905. To indicate the effectiveness of the work that was now being done, Dr. Ferguson reported that, while the incidence of tuberculosis among the Indians in 1928 was twenty times that of the surrounding white population, it was today only thirteen times, a reduction of one-third during that period.

Dr. H. M. Tomy presided at the conference and 25 men and women engaged in the study of the disease took part.

Increase In Poultry

Value Of All Poultry In Canada Placed At Fifty-Four Million Dollars

Poultry keeping is on the increase in Canada. The total number of poultry on the farms in the Dominion at the end of last year was estimated at 66,795,000, of which 56,247,000 were hens and chickens; 2,399,000 turkeys; 1,160,000 geese and 988,000 ducks. The value of all these birds is placed at \$54,855,000. Two years ago the total number of poultry was 53,778,000. Poultry are successfully raised commercially in all of the provinces of Canada. The principal centre of the industry is the Province of Ontario.

"Do I know the business? Rather. I was very useful in the last place—it was I who used to call out to the others, 'Here, here comes the boss.'" —Pages Gales, Yverdon.

Blind Will Benefit By New Invention

Instrument Produces Raised Letters From Ordinary Pages

Robert E. Naumburg, of Cambridge, Mass., has demonstrated for the first time a "printing visagraph," an instrument that produces magnified, raised letters from the pages of ordinary books.

The visagraph reproduces large, embossed letters on a wide roll of thin aluminum foil, with the result that the finished product corresponds in some respects to the Braille system. Naumburg estimates his machine will increase the reading range of the blind a thousand-fold.

A Brain Invigorator

A tube a tired business man can slip over his head to give his brain cells an invigorating diet of electrons was one of the wonders of science presented to the convention of the American Electro-Chemical Society at Birmingham, Alabama. The same tube, J. A. Lee, connected with a trade publication, explained, can be used to reduce fever.

A Quick Thinker

Farm Labourer, to hiker's rosiogaire Farm labourer, to hiker's rosiogaire said: "Didn't you see the notice saying pedestrians ain't allowed here?" Hiker (with great presence of mind): "I'm not a pedestrian. I'm a Congregationist!" Labourer: "Oh, that's different. You can go on."

Manager: "I have just signed a contract for you to appear against Smith." Champion: "I can't box him—we are enemies." —Buen Humor, Madrid.

SCIATICA?

Here is a never-failing form of relief from sciatic pain:

Take Aspirin tablets and you'll avoid needless suffering from sciatica—lumbago—and similar excruciating pains. They do relieve; they don't do any harm. Just make sure it is genuine.

For Mental Health In Canada

Increased Facilities For Care Of Sub-normal People Is Urgently Needed

(By John Burke Ingram)

If all the insane people of Canada were brought together in one place they would form a city larger than Kingston or Kitchener. According to recently compiled figures, there are 29,529 patients in Canada's mental hospitals. These figures include, of course, those suffering from mental disease. Year by year their numbers increase. The Canadian people have invested nearly \$75,000,000 in buildings and equipment, and spend about \$10,000,000 each year in maintenance costs. In every province the hospitals are crowded to capacity, and it is safe to say that there are as many persons attempting to carry on in the community who are in need of treatment as there are in the hospitals at present. There is a crying need in Canada for the establishment of psychopathic hospitals and outpatient clinics to deal with these cases before they become chronic and beyond hope of improvement.

"Many people are more or less familiar with insanity, but comparatively few realize the difference between the insane and those persons who are known as mental defectives. A sufficient definition for the present purpose is that insanity may be termed a "prolonged departure from the individual's normal standard of thinking, feeling and acting; while a mental defective is a person whose mind, through hereditary causes, or through pre-natal or infantile misadventure, has failed to develop normally."

Mental defectives, or defectives, range in intelligence from the idiots and imbeciles, familiar to all, to the more nearly normal morons, or feeble-minded persons whose presence in the community is not so readily detected.

These latter are the great social misfits. They contribute out of all numerical proportion to pauperism, delinquency, criminality, promiscuity and illegitimacy. As children they are "backward." They are slow in learning to walk and to talk; in school they are from two to four years behind other children of the same age. Shamed of their non-progress, they eventually drop out of school and go into the world unprepared to meet the demands to be made upon them as citizens and as parents. Adult in size and years; they are not generally realized that they are not responsible for their actions; and it is not strange that they fail to meet the requirements of organized society and repeatedly send themselves in the jails, the reformatories and the houses of refuge.

Thanks to the efforts of the Canadian National Committee for Mental Hygiene, placed into being and successfully done towards educating mentally defective children at a sufficiently early age to permit them to be trained to a certain facility in one of a number of handicrafts in the hope that they may become self-supporting in their adulthood. It is surprising to learn that many children who might never do more than learn to sign their names and do simple addition and subtraction can be so trained.

The Canadian National Committee for Mental Hygiene, having no other excuse for its existence and no ulterior end to serve, has taken upon itself the task of bringing home to the people of Canada a realization of the supreme importance of mental health, with the hope that through public demand governments will be stimulated to provide these increased facilities that are now so badly needed.

Horsepower Going To Waste

Electricity Could Be Produced At Grand Falls In Labrador

Four million horsepower of electricity was "going to waste" at Grand Falls, in Labrador, Sir Wilfred Grenfell, famous medical missionary to the coast of Labrador, and Northern Newfoundland, declared during a lecture at Montreal. Sir Wilfred said he was attempting to demonstrate to governments that Labrador could be rich in minerals and other natural resources.

Air Telegram Service

Passengers on the Canadian-Lufthansa service between Berlin and Vienna can now hand in telegrams for transmission from the airplane in which they are travelling to ground stations. This service was inaugurated on Feb. 2, with telegrams sent to the Ministers of Communications and Posts.

The trouble with a great many men is they are never satisfied with wasting their own time.

With the exception of ourselves no one ever does things as they should be done.

Village Of Blind People

Nine Hundred Live Hidden Away In Mountains Of Mexico

A village of 600 people, all totally or partially blind, who never venture from their huts until after sundown was described by Dr. Riquel Bustamante, Mexican delegate, at the second Pan-American Conference of Directors of Health at Washington.

The village is Tliltepec, in the state of Oaxaca, Mexico. Hidden away in the mountains, it is reached only by a few trails. The tragedy which blinded the inhabitants is known in the medical world as onchocerciasis.

Tests have shown, Dr. Bustamante said in his speech, that an insect is the cause of the blindness. Radiation of this insect, he added, has given hope in the fight on the malady, of which little is known. There are 20,000 such cases in Mexico.

Aviators Thrill Spectators

Exhibition Of Spectacular Parachute Jumping Staged At Ottawa

As nonchalantly as bathers taking a morning plunge, 12 officers and non-commissioned officers of the Royal Canadian Air Force recently tumbled into space from a height of 2,000 feet in one of the most spectacular exhibitions of parachuting ever staged in Canada. The display was remarkable in that every flyer who went aloft completed what is probably the most hazardous part of the Air Force training with landings that were perfect or near perfect.

Of the dozen daring aviators who performed the feat, ten were negotiating their first parachute leap.

A Magic Soap

How the Fairy Queen's Christening Gift Was Found

Once upon a time the Fairy Queen was asked to be God-Mother to a very important baby Prince. She wanted an especially nice Christening Gift. So she sent her five cleverest children to try and find a magic soap.

Well the first Elf flew to France, and Algeria, and Bulgaria, where he loved roses grow, and asked them to give their pretty frocks for the Magic Soap. And the roses showered their sweet petals into a big sack the Elf had brought with her, all ready to be scrunched up and give a lovely perfume.

The second Elf flew to Africa, and there she made friends with the King's daughter, who gave her a velvet—there that is a scented root—rather like our sweet grass.

And the third Elf flew to India, and found Patchouli—a plant whose leaves smell something like mint, and its pretty yellow wood the sandalwood tree, which is very fragrant.

But the fourth Elf had the most dangerous time, for she daintily flew to an island near Italy called Mesina, where there lived some fierce folk called Bergamots who were very nasty and disagreeable. But she nevertheless was exquisitely perfumed. The Elf crept up upon them the whole trellis was snipped off a bit of their coats here and there where it would not be missed—and was just uptipting away when a big fat Bergamot awoke and with a great yell prepared to fall on her and crush her. But the Elf was the Flower Fairies to help her, and they seized her quickly and hid her beneath a tangle of ivy. The Bergamots had gone to sleep again when she scampered off home with her treasure.

On her way she met the fifth Elf who had clear golden cocoanut oil from Coochin China, and sticky scented gums from the East Indies.

And when they all arrived back they found that the Palace Purveyor Cat who wanted to help his mistress had been all the way to Abyssinia (that is Bible Story Land), to see a cousin of his, the Civil Cat, who carries a delicious perfume with him in a tiny bag and had gladly given it to Pussy; and Pussy had kindly introduced the Fairy cat to a Chinese friend of his, the Musk Deer, who had some rare scent in a secret sack under his tummy which he also gave for the Christening.

How pleased the Fairy Queen was! Quickly she carried all the marvelous things to a Mortal friend of hers who was a soap maker, and he worked with his helpers day and night and produced the most wonderful soap he had ever made just in time for the Christening.

And the Princess grew up so beautiful that she married the richest and handsomest Prince there was, and on her wedding day when the Fairy Queen came to see her, she said: "Dear God-Mother could you ask your friend the Soap-Maker, to make heaps and heaps of my wonderful soap and give it to all the little folk and all the big folk in the world. I feel so selfish enjoying it all myself."

"That is a good kind God-daughter," said the Fairy Queen—and she said the soap maker, who promised to do as the Princess wished.

And he went on making the Magic Soap all his life, and after he died his son and his grandson went on making it. And do you know it is really your Baby's Own Soap and it is made of all the wonderful things that the five Elves found all over the world—and it smells so sweet and makes such heaps of fluffy creamy bubbles and helps little folk and big folk to grow as lovely as the day is long.

Let these 6 vital Salts rid you of PIMPLES

Would you like quickly to free yourself of those hideous pimples—those unsightly blackheads—and have that smooth and soft skin perfection you've always envied?

Do you want to have eyes as dazzling and bright as water dancing in a summer's sun?

Would you like to enjoy glorious health with plenty of energy and possess a keen mind?

Then take a quarter teaspoonful of Kresnel Salts in a glass of hot water every morning before breakfast! Kresnel is a combination of the six vital salts which your nerves, glands and body organs ought daily to receive from food if they're to function correctly and which are impossible to obtain in these days of modern cooking. Kresnel swiftly clears your blood of those harmful acids which cause your skin to erupt—you'll possess a skin like velvet and a head which you didn't think possible!

Planning Bacon Plant For Saskatchewan

Equipment Has Been Secured and Foundation Stone Purchased

Recent press despatches indicate that ambitious plans are under way for the establishment of a bacon curing plant in Saskatchewan. A Prince Edward Island syndicate has purchased a three-quarter section farm close to Long Lake, Strassburg, Sask., for the purpose of producing, raising, and slaughtering hogs, and curing and shipping bacon to England. It is stated that buildings capable of holding 5,000 hogs are being erected. The necessary machinery and equipment has been secured, and foundation stone of pure bred Yorkshire hogs has been purchased and shipped to Long Lake. It is expected this fall that 2,500 sides of Whitehead bacon will be available for shipment.

A native of Denmark, thoroughly conversant with hog production and marketing as carried out in that country, has been placed in charge of the plant.

Sugar From Weeds

Scientists Find That Dandelions, Golden Rod and Other Plants Yield Sugar

Weeds like dandelions and golden rod contain these newly-discovered sugars valued by government chemists at \$50,000 a pound.

The Bureau of Standards in announcing this discovery recently, said, "sugars were not previously known to science. They were found by Dr. R. F. Jackson, of the bureau and his assistant, Miss Emma McDonald, while studying the amount of levulose or fruit sugar that can be obtained from inulin. Inulin is a white starch-like substance, found in the roots of golden rod, dandelions, Jerusalem artichokes, dahlias and chlorella. Dr. Jackson found that inulin is 92 per cent. levulose, a sugar many times sweeter than ordinary cane or table sugar, three per cent. glucose, like corn sugar, and the remaining five per cent. is made up of the new triplets of the sugar family.

"Lord, here is thy pound," the third one said, "which I kept laid up in a secret trust bestowed on him for his immortalizing. And he who lends will one day ask His own again with interest. See to it then, lest thou be found Of those who failed him in the test."

—John Oxenham.

"Lord, here is thy pound," the third one said, "which I kept laid up in a secret trust bestowed on him for his immortalizing. And he who lends will one day ask His own again with interest. See to it then, lest thou be found Of those who failed him in the test."

Pine forests that were a rich source of amber once spread over northern Europe.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

SUNDAY SCHOOL LESSON

MAY 10

THE PARABLE OF THE POUNDS

Golden Text: "It is required in stewards, that a man be found faithful."—1 Corinthians 4:2.

Lesson: Luke 19:11-26.

Devotional Reading: Psalm 103:11-18.

Explanations and Comments

The Reason For Giving the Parable

verse 11.—Jesus and His disciples were approaching Jerusalem, and many were expecting that His entry into the city would be an inauguration of the Messianic Kingdom. Jesus knew that He was going to a far country, but they supposed that the kingdom was immediately to appear. They looked for it to appear suddenly from the outside instead of gradually from within. "They focused their attention on the fact that they were about to enter into a reward, while Jesus put the emphasis on the fact that they were about to enter a trust." Jesus gave this parable to warn those who wished Him to head a revolution and establish His kingdom by force that it would come only by patient faithfulness.

The Parable Of The Pounds, verses 12-26.—Jesus begins His parable with the statement that a certain nobleman went into a far country, to receive for himself a kingdom, and to return. Calling ten servants, he gave each a pound and bade them trade therewith till he returned. A mina, translated a pound, is equal to one hundred drachmas; a drachma was a coin worth about eight pence, or sixteen cents, R.V.M. The sum was small, about sixteen dollars, but it would test their faithfulness. In the similar parable of the talents different sums were entrusted to three men.

To these servants Jesus said, "Trade ye herewith till I come." Wycliffe's Version reads "Merchandise till I come." The word "occupy" in the King James' Version at the time the translation was made had the meaning of "use."

On his return to judge the world (in the parable of the pounds, the nobleman is Jesus Himself), he calls for a settlement with his servants, to learn how faithful they have been to their trust. The case of three, two faithful, and one unfaithful, is taken as typical of all. The first had gained ten pounds more, and is rewarded by being given authority over ten cities. The second had gained five pounds, and is placed over five cities. The third had done nothing.

"Life is God's sacramental gift. To man for his enjoying. The talent given into his care For his son's exercising. A sacred trust bestowed on him For his immortalizing. And he who lends will one day ask His own again with interest. See to it then, lest thou be found Of those who failed him in the test."

—John Oxenham.

"Lord, here is thy pound," the third one said, "which I kept laid up in a secret trust bestowed on him for his immortalizing. And he who lends will one day ask His own again with interest. See to it then, lest thou be found Of those who failed him in the test."

Vaccine For Common Cold

Report Of Interesting Experiments Being Conducted At Columbia University

Hope for a vaccine to prevent the common cold has been found at the Presbyterian hospital of Columbia University medical centre.

The vaccine-making stage has been approached through use of an artificial cold produced in the laboratories—a real cold purified so as to be stripped of many uncertainties that ordinarily hinder the making of discoveries.

This work and the research leading up to it are described in a paper by Doctors A. B. Dochez, K. C. Mills, G. S. Shirley, and Yale Kneeland, Jr. in the Courier, official publication of the International Catholic Federation of Nurses. The research is financed by the National Foundation, Inc.

At first real colds were given to chimpanzees until Dr. Dochez and his associates felt quite sure that no known ordinary bacteria caused colds, but that they only became aggravated, active and often dangerous as a result of a virus which is the real cause.

The synthetic colds were produced by infecting the "chimps" with nasal washings completely purified of disease bacteria, and which presumably contained only the filterable virus.

Exposure of these synthetic infections produced in 90 per cent. of the chimpanzees colds "exactly similar in all respects" to real colds. Tried on human beings the artificial cold performed with precisely the same percentage and effects.

"The experiments lead us to certain definite conclusions," says the paper. "The contagious cold in human beings is due to an invisible agent which passes readily through filters which hold back all ordinary bacteria, and, in all likelihood, belongs to the group of so-called sub-microscopic viruses."

"The next step in the investigation is to try to grow the virus of the common cold in the test tube outside the human body. Should this be successful, and there is already reason to think that it may be, the way will be opened for the preparation of a vaccine which may prove useful in prevention of common colds."

"The experiments lead us to certain definite conclusions," says the paper. "The contagious cold in human beings is due to an invisible agent which passes readily through filters which hold back all ordinary bacteria, and, in all likelihood, belongs to the group of so-called sub-microscopic viruses."

Personal and Local

Mrs. C. W. McKinnon left on Monday to visit friends in Calgary.

St. Paul's United church concert by the choir on May 13; admission 50c.

Miss Evelyn Higginbotham is home for three weeks holidays from Nelson general hospital.

The Canadian Weekly Newspapers Association will hold its annual convention in Regina, and proceed to Banff for a brief visit.

Permanent waving, \$10 and \$12. Book orders early at Huffman's Beauty Parlor, for Mon and Tues. May 11 and 12, or Phone 241 M.

The Ladies Aid of Holy Ghost church will hold a whist drive in their parish hall on Thursday, May 7. Good prizes and refreshments. Admission 35c.

"A progressive shoe retailer says: 'I find in everything that the best always brings the best results. And that advertising pays better in dull times than in good ones.'—Printer & Publisher.

All householders are requested to clean up rubbish and remove it to the dumping ground. By everybody uniting in an effort to clean up, a very much improved appearance to the town will be secured.

Rev. and Mrs. A. E. Larke are leaving for a vacation and intend travelling by auto to the coast, arrangements having been made with the church trustees to enable them to take a holiday following their recent bereavement.

Remember that your competitor considers your customers his prospects and he is working just as hard to get these customers away from you as you should be working to increase your business.

Coleman tennis club will hold their annual dance next Wednesday in the Grand Union, invitations having been sent out. It is expected there will be a large attendance both locally and of out-of-town friends.

The following stores are offering specials appropriate for Mother's Day: McBurney's Drug Store, cards and candies; Palm Confectionery, special boxes of candies as advertised; Frank G. Graham, choice potted and cut flowers; Antrobus' Shoe Store, ladies hose.

St. Paul's church choir will hold their concert next Thursday. The members give of their time and energy to brighten the services, therefore encourage them by attending the concert, at which a very fine program will be given by leading singers of the Pass towns. Tickets are 50c each from any of the members.

In order to secure new customers and retain the old, every merchant must take into consideration the importance of advertising in his local paper. It is as vitally important as dressing the store window. People shop where they are invited, and advertising begets confidence. That is why nationally advertised products maintain sales volume. The printed word undoubtedly is a powerful selling force.

Blairmore Elks Lodge and their own Boy Scouts are sponsoring the play "It Pays to Advertise!" to be held in Columbus hall, Blairmore, on Friday, May 15th. The splendid reception which Coleman Players were accorded on their presentation here of this play earned well deserved praise, and there is no doubt they will be accorded a good reception in Blairmore, especially as they have the Elks Lodge to put some "pep" and vigor into the ticket selling campaign.

Palace theatre announce for the week-end a First National Vitaphone technicolor picture "Kiss Me Again." That clever young actress Bernice Claire is in the leading role, supported by Everett Horton, Walter Pidgeon and June Collyer. The production is spoken of as one of Vitaphone's greatest achievements.

Henry Tiberghien, who works in Coleman Hardware Co. store, would be a bad man to get into a gun-fight. He can plug the bullet in the target nine times out of ten, and the tenth is so close that you would be as good as dead if you were the target, unless he indulged in the playful sport of knocking off your hat with revolver shots. A nifty range has been fitted up in the basement of George Neil's store, where several marksmen gather at frequent intervals. Henry caps them all for steady nerve and accuracy, and if he took to the range and became a wild western the only way rivals would get the drop on him would be to catch him asleep.

Mr. and Mrs. H. T. Halliwell attended the graduating exercises of the class of 1931 of Medicine Hat general hospital, held in Fifth Avenue United church. Their daughter Margaret was the valedictorian, and was awarded the gold medal for surgical nursing, presented by Dr. D. N. MacCharles. Miss Lilian M. Larsen, of Haynes, Alberta was awarded the gold medals for highest marks in theory and for obstetrical nursing, these being presented by the board of directors and Dr. F. W. Gershaw, M.P. Edna M. Edwardson, of Taylor, Sask., was awarded the gold medal for practical work and conduct, presented by the board of directors. A very fine program was given by several of the leading soloists of the city, Mr. Beveridge, chairman of the board, presiding. Dr. Campbell gave the address to the graduating class, and Rev. Canon Western the address to the gathering. Miss Edna M. Auger, superintendent of nurses, presented the class pins, and Mr. Beveridge the diplomas. The staff reception and dance was held the following evening.

CLASSIFIED ADVERTISEMENTS
NOTICE—Have you something to sell? Advertise it in this column. 2c a word, minimum charge 35c.

FOR SALE—Turkey eggs, big stock, 10c each. Geese eggs 20c each, also young turkeys. P. O. Box 172.

FOUND—A Camera, looser may have same by paying for this advertisement, and applying at Journal office.

Mr. and Mrs. Sam Moores and Miss Evelyn Ford motored to Calgary last Friday to attend the graduation exercises of the general hospital, their daughter Mae being a member of the 1931 class. She will complete her training in September.

The Canadian Westinghouse Co. through their local dealers, Crown Nest Pass Motors, have donated a loud speaker to Coleman hospital, so that the reception may be heard equally as well on the upper floor as in the wards below, and all may enjoy the programs.
